Cybersecurity Engineer | Detection Engineering · Security Automation · Application Security Assessments

PROFESSIONAL SUMMARY

Cybersecurity engineer and CISSP holder with over 10 years across municipal, defense, and government environments. Owns detection engineering, application security assessments, and the NIST CSF 2.0 control program for the City of Chesapeake security team, and automates that pipeline in Python and PowerShell so vulnerability and assessment findings become POA&M entries and compliance evidence instead of spreadsheets. Pairs hands-on engineering with least-privilege and defense-in-depth design, translating complex security topics into clear, actionable guidance for technical teams and executive stakeholders alike.

TECHNICAL SKILLS

Detection & Incident Response: Secureworks Taegis SIEM/XDR, Sophos EDR, SentinelOne EDR, Arctic Wolf MDR, IDS/IPS, detection engineering, alert tuning, threat hunting, log analysis

Security Architecture: Zero Trust design, network segmentation and micro-segmentation, least privilege, defense in depth, threat modeling with OWASP Threat Dragon and STRIDE, architectural risk assessment, FIPS 199 categorization

Vulnerability & Application Security: Tenable Security Center, Nessus, credentialed scanning, vulnerability management program operations, CIS Benchmarks, DISA STIGs, POA&M lifecycle, OWASP Top 10, SDLC security review, Nmap, Wireshark

Cloud, Identity & Data Security: Microsoft Entra ID Conditional Access and phishing-resistant MFA; Microsoft Purview DLP, eDiscovery, litigation holds, and sensitivity labels; Varonis; PKI and CAC credentialing; email security controls

Engineering & Automation: Python, PowerShell, Ansible, Bash, Git, REST API integrations for security tooling, scripted remediation and reporting pipelines

Infrastructure & Virtualization: VMware vSphere, hardened templates and baselines, Red Hat Linux and Windows hardening, Palo Alto, pfSense, Infoblox DDI

Governance & Compliance: NIST CSF 2.0, NIST RMF, NIST 800-53, CIS Controls v8, PCI-DSS, HIPAA, CJIS, third-party risk review, ServiceNow, Drata, BitSight

PROFESSIONAL EXPERIENCE

Systems Security Analyst | City of Chesapeake DIT via Apex Systems **Dec 2025 – Present**

- Own detection engineering across Secureworks Taegis SIEM/XDR and Sophos EDR, developing detection logic and tuning alerting for earlier, higher-fidelity signal across endpoint and network assets.
- Support vendor risk management in BitSight and Drata, assessing third-party security posture and contributing findings to the city's software intake process.
- Built a Python CJIS-to-CSF crosswalk that scores BitSight vendor exports against all 597 numbered CJIS requirements, turning subjective vendor reviews into repeatable compliance workbooks.
- Built PowerShell automation that normalizes vulnerability and assessment findings into NIST CSF 2.0–mapped POA&M entries and Drata imports, replacing manual tracking for hundreds of findings.
- Lead application security assessments for in-house and third-party applications, pairing STRIDE threat modeling in OWASP Threat Dragon with FIPS 199 categorization and control-gap analysis to drive prioritized remediation.
- Used PowerShell to pull Entra ID authentication-method data, identifying users affected by the retirement of SMS and voice MFA in support of the move to phishing-resistant authentication.
- Author security SOPs, triage playbooks, and NIST CSF 2.0 control narratives, briefing findings to system owners and department leadership.

Cybersecurity Analyst II | City of Virginia Beach, Virginia Beach, VA **Jan 2025 – Nov 2025**

- Engineered data security controls in Microsoft Purview and Varonis, tuning DLP and sensitivity-label policies, executing litigation holds and eDiscovery searches, and remediating overexposed data and excessive permissions.
- Operated the enterprise Tenable Security Center deployment, managing scan policies and credentialed scanning and delivering risk-based remediation guidance to system owners.
- Reviewed system architecture submittals and assessed applications and IT infrastructure for risk and threats, supporting DevSecOps and threat modeling practices.
- Operated the enterprise anti-malware platform, managing policy, scanning, and remediation, and participated in security monitoring and incident investigations.
- Matured GRC and vendor risk frameworks and led security audits and policy reviews, producing formal remediation roadmaps for leadership.
- Ran cybersecurity awareness training and phishing simulations through KnowBe4, reducing social engineering risk.

Cybersecurity Administrator | City of Hampton, Hampton, VA **2023 – 2025**

- Designed and implemented the city's security policy suite from the ground up, achieving PCI-DSS compliance and CIS Controls v8 alignment.
- Administered enterprise security tooling including firewalls, IDS/IPS, endpoint protection, and patch management across approximately 800 endpoints, enforcing hardening baselines.
- Investigated security incidents in SentinelOne EDR and Arctic Wolf MDR, performing triage and root cause analysis and delivering remediation recommendations to management.
- Delivered cybersecurity training to more than 1,400 users through Proofpoint LMS, improving security awareness and reducing risk from human error.
- Authored security assessment reports, policy documentation, and executive summaries supporting regulatory and leadership reporting.

Cybersecurity Operations Analyst | Huntington Ingalls Industries, Suffolk, VA **2022 – 2023**

- Managed firewall change control in a defense environment, reviewing Layer 3 ACLs, application and port requirements, and segmentation policy to enforce least privilege across production systems.
- Conducted risk analysis and independent verification of security configurations, mapping scan and STIG findings to NIST 800-53 controls and producing risk reports and POA&M entries for network devices.
- Led the in-house application security auditing program, partnering with development teams to identify and remediate code-level vulnerabilities across the secure development lifecycle.
- Analyzed network traffic, log data, and system behavior to investigate anomalies and support incident response in a high-assurance defense environment.
- Served as CAC Registration Authority across NIPR and SIPR, performing identity proofing and issuing DD Form 2842 PKI credentials for privileged system access; executed the HBSS migration and endpoint compliance strategy.

Linux System Administrator | Huntington Ingalls Industries, Suffolk, VA **2021 – 2022**

- Upgraded 15 servers from RHEL 7 to RHEL 8, establishing hardened baseline configurations and documenting the process for a repeatable transition.
- Administered VMware virtualization, building hardened server templates and maintaining secure configuration baselines across virtual workloads.
- Authored system scripts and Ansible playbooks for routine administration and patching, sustaining security and availability across mixed Windows and Linux environments supporting over 100 information systems.

Technical Support Analyst | Old Dominion University, Norfolk, VA **2017 – 2021**

- Built and optimized the ServiceNow Knowledge Management System, standardizing IT support processes across the desktop support organization.

Earlier IT roles | Anblicks and Ingenuiti, Virginia Beach, VA **2015 – 2017**

- System administration and infrastructure deployment for a hospital build-out and a corporate network, spanning servers, workstations, POS systems, and thin clients.

PROJECTS

- Agentic EdgeSOC, M.S. project defense (passed Oct 2026): built a local multi-agent AI security operations center for IoT networks using CrewAI agents on Ollama with Zeek network monitoring on a Raspberry Pi 5.

EDUCATION

Old Dominion University, Norfolk, VA

M.S., Computer Science, expected May 2027 · B.S., Cybersecurity · B.S., Business Administration, Information Systems & Technology

Tidewater Community College, Norfolk, VA

A.S., Business Administration

CERTIFICATIONS

ISC² CISSP · CompTIA SecurityX · CySA+ · Cloud+ · ISC² CC · Microsoft Azure Fundamentals AZ-900

Also: Security+ · Network+ · Linux+ · A+

Fluent in English and Spanish
